Subject: I support HJ64

Dear GEA Committee,

My name is John Guccione and I'm a resident of Old Saybrook CT. I'm writing this to inform you of my strong belief in the importance of voting in HJ64. I believe that the Supreme courts decision in Citizens United Vs. The Federal Election Committee was a major mistake, and has perverted the election process to such a degree that it has undermined our system of government. I have no faith that the current congress or any future congresses will have any ability to curtail this problem since it was elected under the already flawed system and have every reason to keep things as they are. Therefore it is the inherent responsibility of the states to organize and amend the constitution when congress will or can not and to have free and fair elections through an Article 5 Convention. My belief is that this problem is at the root of all other problems facing our national politics at this time. It is non-partisan and a common sense fix to a very bad problem. Thank you for your time.

Sincerely,

John Guccione
